EDUCATION

University of California, San Diego

Bachelor of Science in Data Science

Expected Graduation: March 2026

GPA 3.6

EXPERIENCE

Viasat

Aug. 2025 – Present

Data Scientist

Carlsbad, CA

- Under the Government Services and Solutions (GSS) team to help stakeholders better understand, optimize, and fully leverage Viasat's global satellite network data for mission-critical decision-making.
- Designed and delivered data-driven insights and visualizations that translated complex satellite telemetry and coverage metrics into actionable intelligence for technical and non-technical audiences.
- Architected and implemented scalable back-end services on Google Cloud Platform (GCP), leveraging BigQuery, Compute Engine, Docker, and Cloud Storage.
- Collaborated closely with engineers, data scientists, and government-focused product teams to align technical solutions with operational and strategic requirements.

Viasat

Mar. 2025 – Aug. 2025

Full Stack Software Engineering Intern

Carlsbad, CA

- On a team of 2, engineered a **0 to 1 full-stack app** showcasing Viasat's global satellite network coverage, creating the front end with **TypeScript**, **React**, and **Mapbox**
- Developed a back end utilizing **Google Cloud Platform (GCP)**, **BigQuery**, **Google Compute Engine (GCE)**, and **Docker**
- Deployed scalable API endpoints and data pipelines on **GCP**, leveraging services like **Cloud Storage**, **Cloud Dataflow**, and **BigQuery**, to efficiently process, store, and deliver satellite network coverage for **10+ million** points of data

Deloitte

Jan. 2024 – June 2024

Data Science Mentorship Program

La Jolla, CA

- Directed a cross-functional **team of 6 students** to design and deploy a **predictive business analytics app** capable of forecasting and analyzing Amazon customer purchasing trends
- Developed and optimized high-performance data pipelines to process and transform **1+ Million Amazon transaction records**, enabling seamless ingestion, cleaning, and preparation for advanced ML models
- Partnered with Deloitte over 6 months, presenting technical solutions and learning career insights to practitioners and UCSD students using **Tableau** and **Google Slides**

PROJECTS

[Google GenAI For Good: Detecting Misinformation Online](#) | Tools

Sep. 2025 – June 2026

- Building and evaluating **NLP pipelines** in **Python** using **Google AI Studio**, **Hugging Face Transformers**, and **Scikit-learn** to perform tokenization and text classification on large-scale datasets.
- Engineering advanced prompting strategies in Google AI Studio to improve **text generation** and **contextual bias analysis**, leveraging **transformer architectures** for nuanced, context-aware outputs.
- Integrating **Google AI Studio API** via **FastAPI**, applying **Pandas** and **NumPy** for preprocessing, and employing model evaluation metrics (F1 score, precision) alongside ethical AI practices.
- Collaborating in a **team of 4**, presenting weekly updates to Google directors to align project milestones with industry-standard software development lifecycles.

TECHNICAL SKILLS

Languages: Python, SQL (PostgreSQL, NoSQL), Java, JavaScript, TypeScript, R, HTML/CSS

Cloud & Data Platforms: Google Cloud Platform (BigQuery, Cloud Storage, Compute Engine, Dataflow), AWS

Data Science & ML Libraries: pandas, NumPy, scikit-learn, Dask, seaborn, Matplotlib, plotly, xarray, Hugging Face

Frameworks & APIs: FastAPI, TensorFlow, D3.js, Mapbox

Developer Tools: Git, GitHub, Docker, Jira, Jupyter Notebooks, Google AI Studio, REST APIs, MATLAB, Visual Studio Code, IntelliJ
